**Sparking
Imaginative
Learning**

Bugs!

Explore the world's most abundant animals! How do insects defend themselves? These questions and more are answered with fun, hands-on activities to further investigate these fascinating creatures! Students will closely examine a giant preserved Lubber grasshopper and take home an Insect-a-Vision.

Detective Science

Discover how science is used to solve crimes! Watch as the classroom is transformed into a crime lab for this exciting exploration of the fundamentals of forensics. Take home your very own Personal Profile Kit.

Earthworks

Investigate the most fascinating planet in our solar system... Earth! Take readings from a seismograph. Discuss the Earth's crust, mantle and core; learn about volcanoes and make one erupt. Build your own sedimentary stacker to take home.

Movie Effects

Learn how "persistence of vision" makes movies so realistic. Discover how sound effects are created and used. Try out some cool anaglyph glasses. Take home your own Cartoon Creator with a mini-flip book and mini-stencil to create your own short animated feature.

Walloping Weather

Let's talk about the weather! Students learn why certain cloud types form. In class, we make a cloud inside a bottle. Discover the power of air pressure, thunder and lightning. Make and take home a sun bead project which will be your personal ultraviolet ray detector.

Science of Toys

Discover the science behind some of your favorite toys in this fun-packed program! Experiment with a vector table walker, a gravity defying magnetic gyro wheel and more. Take home a Mad Science yo-yo that uses linear and angular momentum at the same time!

Easy ways to register

1. Register online <http://register.madscience.org/mn/>
2. Return registration and payment to Mad Science, 519 Payne Ave, St. Paul, MN, 55130
